

X Card Duplicator

This is a simple batch file driven duplicator that you can build yourself.

You need

- **USB Card Readers**
- **USB Splitter**
- **Software**
- **Instructions**

- One computer can allow you to duplicate 24 USB sticks, or 18 Flash cards
- It does need a little OS know-how to install.
- The X Card Duplication Program allows you to Duplicate up to **12 Memory Cards** at a time or up to **23 USB Sticks** simultaneously.
- Option to **Format USB Only** or **Format Then Data Copy** or **Data Copy Only**
- The X Card Duplication System is supplied on CD or downloadable at a cost of \$300.00, payable per secure payment by Visa, MC or Amex. Included is all the software to operate, with free upgrades to December 2007, and full instructions to build and where to buy the most suitable parts for your system.
- The memory card software is only available to current IDDA members, and has been sold to users in the USA, UK, Italy, India and Israel. eMail brk@discdupe.org to join and order.
- **Alternatively the whole or part of the system can be purchased from CD-ROM Services Pty Ltd 173 Pacific Highway, North Sydney, NSW 2060. Ph. 02 9954 9885 www.cdroms.com.au.**

CD-ROM Services Pty Ltd offers an accurate and fast memory card loading service, either onto your own media or our media at very competitive prices.
